Tangerang, Indonesia

Informatics student with practical expertise in Data Analytics and Web Engineering. Skilled in transforming raw data into business insights using Python, SQL, and Google Analytics, and developing functional web applications. Bringing a combination of technical precision and leadership experience to drive operational efficiency and data-driven decision-making for potential employers.

Project Experiences

Credit Default Risk Prediction - Tangerang, Indonesia

Sep 2025 - Dec 2025

Data Analyst

Academic Research Project

- Aimed to minimize potential financial losses by identifying high-risk loan applicants using machine learning strategies.
- Engineered a data pipeline for 307,000+ credit records and implemented SMOTE techniques to resolve severe class imbalance.
- Developed a LightGBM model achieving 0.741 ROC-AUC, providing a reliable scoring tool for credit approval assessments.

US Aviation Recovery Analysis - Tangerang, Indonesia

Nov 2025 - Dec 2025

Data Analyst

Personal Project

- Analyzed 100K+ US flight records (2017–2022) to identify Operational Rust patterns and post-pandemic delay surges.
- Identified Carrier Delay as the primary cause and built a Tableau dashboard tracking 8 key performance metrics.
- Formulated 3 strategic recommendations to improve crew efficiency and reduce peak-season operational delays by 15–20%.

Pizza Delivery Efficiency Analysis - Tangerang, Indonesia

Nov 2025 - Dec 2025

Data Analyst

Personal Project

- Conducted analysis to optimize delivery operations and identify top-selling products during peak hours.
- Processed transaction datasets using Python to analyze sales patterns across 5 product categories.
- Formulated recommendations estimated to increase peak-hour efficiency by 10-15%, visualized through an interactive dashboard.

"Grow Children" Attendance System (Church Community) - Tangerang, Indonesia

Oct 2024 - Dec 2024

Full-Stack Developer

Academic Project

- Developed a full-stack attendance system using Laravel, MySQL, and Figma, replacing manual processes to improve data accuracy.
- Successfully deployed the system for daily community use, streamlining administrative workflows for the staff.

Education

Universitas Multimedia Nusantara - Tangerang, Indonesia

Aug 2023 - Aug 2027 (Expected)

Bachelor of Informatics, 3.73/4.00

- Awarded the Academic Achievement Scholarship for the Odd Semester 2025/2026 with a minimum semester GPA of 3.75.

Organization Experience

Ultimagz - Tangerang, Indonesia

Nov 2024 - Present

Head of IT Department

- Led a team of 5 IT members to manage Ultimagz's public-facing website, supporting the publication of 5+ articles weekly.
- Fixed bugs, improved site performance, and designed new pages to support editorial and organizational workflows.
- Implemented Google Analytics to track user behavior, providing data insights to optimize editorial content strategy.

KAMI UMN - Tangerang, Indonesia

Sep 2025 - Oct 2025

Moderator of the UMN Alumni Sharing Session

- Coordinated the flow of a 90-minute online session, managing speaker transitions and time control for 20+ participants.
- Delivered structured communication to ensure the discussion remained focused, informative, and professionally executed.

Career Preparation 2025 - Tangerang, Indonesia

Jul 2025 - Sep 2025

Event Coordinator

- Led a team of 7 to execute the event, coordinating cross-functional teams and 29+ speakers to attract 2,500+ participants
- Served as Master of Ceremonies for the 8-hour main event, maintaining high engagement and professional flow for 600+ attendees.

Skill & Achievement
